NEWSLETTER SEPTEMBER 2016

NESSI - the European Technology Platform for Software, Services and Data

Dear NESSI Member,

We are pleased to present to you the September 2016 edition of the NESSI Newsletter and to cordially invite you to the **NESSI networking event on Sep 26**, taking place in the evening of the Bratislava Proposers Day.

As always, we hope that you find this edition of NESSI news interesting and would welcome you to follow us on LinkedIn (NESSI ETP) or check out our website www.nessi-europe.eu for the latest updates.

Best regards,
NESSI Office

H2020 Experience Survey

We invite you to complete a survey to share your experiences in participating in Horizon 2020 Calls for proposals. As well as gathering opinions of H2020 in general, some questions are specific to the research areas most relevant to NESSI Members. The survey consists of a simple questionnaire with some 30 multiple choice questions, which you can complete online here.
The survey will be open for one month. NESSI will analyse the results to present to the European Commission as input for forthcoming Calls and to all participants who provide their email addresses.

NESSI White Papers

NESSI has recently published two white papers, looking at security and privacy, as well as cyber physical systems, from a NESSI perspective.

NESSI White Paper on Security and Privacy - From the Perspective of Software, Services, Cloud and Data

This white paper focuses on the increasing role of security and privacy and highlights research directions from a NESSI perspective. The paper does not aim to look at security and privacy

Join the NESSI Members Event in Bratislave on 26 September 2016!

NESSI is organising a Members networking evening during the ICT Proposers' Days. We look forward to welcoming NESSI Members on Monday 26 September 2016 at the Crowne Plaza Bratislava at 19:00 for drinks, light bites, informal networking and consortium building.
Please register by sending an email to office@nessi-europe.eu.

from all angles, but on the impact on software, services, cloud and data of all kinds. You will find more details on our website, where you can download the white paper.

NESSI White Paper on Cyber Physical Systems

The NESSI White Paper on Cyber-Physical Systems (CPS) identifies relevant challenges and opportunities for CPS, focussing on the impact of CPS on the main areas of NESSI and vice versa. In particular the paper assesses the impact of having more and more software-intensive elements in CPS. You will find more details on our website, where you can download the white paper.
